ABOUT

I'm a passionate Front-End Developer with over two years of hands on learning and project experience in building responsive, user-friendly web applications. I specialize in React and TypeScript, and I'm currently expanding my expertise in Next.js and Vue.js to create more dynamic and high-performing interfaces.

I enjoy turning ideas into functional, visually appealing digital experiences with clean and efficient code. In addition to modern JavaScript frameworks, I'm also skilled in using WordPress to design and develop professional websites tailored to clients' needs.

My goal is to continuously grow as a developer by learning new technologies, improving user experience, and building web solutions that make a meaningful impact.

PROFESSIONAL EXPERIENCE

BinIt (Althub) ✉

05/25 – 10/25

Frontend Developer

- Collaborated with designers, frontend and backend developers to build a smart waste management app into interactive web applications.
- Developed reusable UI components using frameworks like React, ensuring consistency across the product.
- Integrated APIs and backend services to display and manage real-time data.
- Ensured responsive design, so the product works smoothly across all screen sizes and devices.
- Tested and debugged to maintain quality and reliability.
- Using version control tools (like Git) to collaborate effectively within a development team.

SkillConnect (Client-Artisan App) ✉

07/25 – 08/25

Frontend Developer

As a Frontend Developer, I was responsible for building the user-facing side of a web application that connects clients with skilled artisans. Using React, Tailwind CSS and JavaScript, I developed responsive, interactive interfaces that made it easy for users to find, hire, and review artisans.

Key Responsibilities:

- Developed the app's UI components in React, ensuring a smooth and engaging user experience.
- Integrated RESTful APIs built with Node.js and Express to display artisan profiles, services, and bookings.
- Implemented form handling and client-side validation for registration, login, and job requests.
- Used CSS and responsive design principles to ensure the app looked great on all devices.

- Managed **state and data flow** efficiently for real-time updates and seamless navigation.
- Collaborated with the backend team to ensure smooth integration with **MongoDB** for storing user and artisan data.
- Deployed the app and tested for performance, usability, and accessibility.

HealthGuard (HEALTH APP) ☀

05/24 – 09/24

Frontend Developer

Built the app's user-facing interface using **HTML, CSS, and JavaScript**, creating responsive, accessible, and performant pages that display real-time health data and support seamless interaction between users and backend services.

Key responsibilities

- Structure and markup with **HTML** to create semantic, accessible interfaces.
- Styled and responsive layouts with **CSS** (mobile-first, adaptive grid/flex layouts).
- Client-side interactivity with **JavaScript**: fetching APIs, rendering live health metrics, form handling, and UI updates.
- Optimize performance and accessibility for fast load times and inclusive UX.
- Collaborated with designers and backend engineers; use Git for version control.

SKILLS

Frameworks & Libraries

- **React.js**
- **TypeScript**
- **Next.js**
- **Vue.js**
- **Wordpress**

Soft Skills

- Quick learner with strong attention to detail
- Excellent problem-solving and communication skills
- Passionate about continuous learning and staying updated with new technologies

Web Development

- Responsive Web Design
- Cross-Browser Compatibility
- Experienced in **WordPress** – skilled in creating, customizing, and managing websites using themes and plugins
- Proficient in **HTML5, CSS3, and JavaScript (ES6+)**
- Strong grasp of **responsive design, cross-browser compatibility, and UI/UX best practices**

Tools & Methodologies

- VS Code
- Version control with **Git & GitHub**
- Package management with **npm** and **pnpm**
- Familiar with **Vite** and **Web pack** for development builds
- Comfortable using **Tailwind CSS** for modern, utility-first styling
- Usage of Slack, zoom, google meet for team meetings and collaborations.

No Code Web Development (WordPress using Elementor)

As a No-Code Web Developer, I specialize in building functional and visually appealing websites using no-code and low-code platforms such as WordPress using Elementor. I focus on creating responsive, user-friendly designs that meet client needs without relying heavily on traditional programming.
